

Dear Customer/Homeowner:

The Pearl River Water Supply public water system is seeking customers to participate in the Safe Drinking Water Act Lead and Copper Rule monitoring requirements. The purpose of this program is to take a sample of drinking water from your home and have it analyzed by the Mississippi State Department of Health for lead and copper content.

If you would like your home to be chosen as a potential sampling site for this purpose and believe your home could meet the requirements set forth by the Environmental Protection Agency. Please complete a Lead and Copper Rule Homeowner Questionnaire and return to one of our Offices, by email to vhill@therez.ms, or by fax 601.992.2847.

In addition, the current homes that are already on the Lead and Copper sample site will have a Pearl River Valley Employee visit in person sometimes in the next month to have Questionnaire filled out.

We appreciate your assistance as we take steps to comply with the Lead and Copper Rule.

Sincerely,

A handwritten signature in black ink that reads "Steve Clark". The signature is written in a cursive, slightly slanted style.

LEAD AND COPPER RULE HOMEOWNER QUESTIONNAIRE

| | | |
|------------------------|-----------------|----------------|
| Homeowner Name: | Address: | PWS ID: |
|------------------------|-----------------|----------------|

To assist the Public Water System in the Lead and Copper Rule (LCR) Site Plan validation process, this homeowner questionnaire has been developed. The questions included are designed to help make a reasonable determination as to what Tier designation a given connection may be classified as defined in the LCR.

| | | |
|--|------------------------------|-----------------------------|
| 1. Would the connection be classified as single family structure? | <input type="checkbox"/> Yes | <input type="checkbox"/> No |
| 2. Was the building at this connection constructed after 1982 but before 1987? | <input type="checkbox"/> Yes | <input type="checkbox"/> No |
| 3. Does the connection contain copper pipes with lead solder? | <input type="checkbox"/> Yes | <input type="checkbox"/> No |
| 4. Does the connection have a lead service line from the meter to the home? | <input type="checkbox"/> Yes | <input type="checkbox"/> No |
| 5. Has the plumbing been replaced at this location since the initial construction? | <input type="checkbox"/> Yes | <input type="checkbox"/> No |
| 6. Has a lead swab test been performed at the connection? | <input type="checkbox"/> Yes | <input type="checkbox"/> No |

Sample Site Plan Tier Designation

| | | |
|---------------------------------|---------------------------------|---------------------------------|
| <input type="checkbox"/> Tier 1 | <input type="checkbox"/> Tier 2 | <input type="checkbox"/> Tier 3 |
|---------------------------------|---------------------------------|---------------------------------|

Does the designation of this site warrant addition to the current LCR site plan for the Public Water System?

| | | |
|------------------------------|-----------------------------|--|
| <input type="checkbox"/> Yes | <input type="checkbox"/> No | If site should be added, you MUST denote the new site on the Sampling Site Plan |
|------------------------------|-----------------------------|--|
