

2022-2023 Dredging Schedule

Barnett Reservoir

Revised 10/11/22

Dredging of selected boat channels in the Barnett Reservoir is ongoing. The following schedule lists the areas to be dredged and the anticipated time frame when the dredging of each area is planned to occur. The areas are listed by subdivision, street name, and street address. If the street address of a waterfront property is not listed, the channel adjoining that property is not included in the current dredging project.

PRVWSD's dredging contractor will be dredging only the boat channels. They will not dredge inside boat houses, boat slips or closer than 10 feet from any structure. Leaseholders wishing to have material removed from boat houses or boat slips must contract separately for these services. Material from boat houses or boat slips can be moved to a point 10 feet outside the boat house or slip, and at least 10 feet from any seawall or other structure, where the dredge will pick it up. Only boat houses and boat slips are to be excavated. **Excavation along seawalls and shorelines is not permitted.**

Hemphill Construction Company will be the contractor performing the dredging work for PRVWSD. Hemphill and several other contractors have expressed a willingness to contract separately with lease holders to remove material from boat houses and slips. The schedule will allow interested lease holders to know when they will need to have arrangements made for these services.

A list of contractors that have expressed interest in providing boat house/slip services is attached to this document.

Please note that this schedule is subject to change based upon the contractor's actual progress. It will be updated and reposted to the PRVWSD website if changes become necessary. Notifications of schedule updates will be sent out via the PRVWSD text alert notification system. See instruction on the website's Home page <https://www.therez.ms.gov/pages/default.aspx> to sign up for text alert notifications.

If you have questions concerning this schedule, contact Mark Beyea at 769-300-2026.

Boat House/Slip Dredging Services

Hemphill Construction	Contact: Tim Temple 601-932-2060
Wilco Construction	Contact: Barry Willis 601-500-2002
Thweat Construction	Contact: Richard Cottrell 601-504-9068
DeWeese Enterprises	Contact: Dewitt Deweese 601-951-3340

The contractors listed above have expressed a willingness to contract with Barnett Reservoir leaseholders for removal of sediment from boat houses and boat slips. This list is not exclusive. Other contractors may be available to perform these services. Inclusion on this list does not constitute an endorsement by PRVWSD. This information is provided as a courtesy to leaseholders.
