

As a result of the extremely hot and dry conditions, we are issuing a precautionary water conservation notice. These conditions have led to an usually high demand on PRV's water systems. Should these conditions continue, some areas could see low pressure.

TIPS FOR CONSERVING WATER

1.

TURN OFF THE TAP
WHILE BRUSHING
YOUR TEETH.

2.

IF YOU MUST WATER
YOUR LAWNS, WATER
THEM LATE AT NIGHT
OR EVERY OTHER DAY.

3.

ENSURE THAT YOU
DON'T HAVE ANY
LEAKS BY CHECKING
TAPS AND PIPES.

4.

RUN DISHWASHERS
AND WASHING
MACHINES WHEN
LOADS ARE FULL.
