

2025 Barnett Reservoir Dredging Operations April 2025

We're happy to announce that dredging operations are set to resume in the coming weeks in the following neighborhoods: *Northbay, Palisades, Arbor Landing, and Lake Harbor*, in that order. Barring unforeseen obstacles or incidents, we hope to have the project finished by November of this year. Please see the attached schedule and maps for further details.

For financial and legal reasons, will not dredge inside boat houses, boat slips, or within 10 feet of any structure. Leaseholders may privately contract with dredging companies to have materials in these areas dredge and moved to the channels, 10 feet away from any structures. Please note: Excavation along seawalls and shorelines is not permitted.

If you contract with a private dredging company for boat house/boat slip silt removal, you must notify PRV with the following information: contractor's name, phone number, address of the location, and an estimated amount of material that will be moved. Send this information to Brigitte Walker at PRV at 601-856-6574 or bwalker@therez.ms. We have attached a list of contractors.

We're excited to resume dredging operations for our leaseholders, and we appreciate everyone's patience. Please know that updated schedules will be posted to our [website](#), if need be.
